

# Solar Energy

## A Clean Solution for Today's Energy Needs

EDF Renewables designs and builds solar projects both on large and small scale. We develop assets contracted as long-term offtake agreements or via turnkey solutions for customers that desire to own the facilities.

Our tailor-made solutions meet the growing energy needs and demands of utilities, municipalities, cooperatives, government entities, universities, and corporations.

EDF Renewables is about more than just producing clean, renewable energy for today's world. We're committed to providing future generations with the means to power their lives in the most economic, environmental and socially responsible ways possible.

**5.7 GW**

developed

**634**

grid-scale, distribution-scale and onsite projects constructed and operating in North America

**35+**

years of experience in renewable energy

## POTENTIAL BENEFITS OF A 100 MW SOLAR PROJECT

**20,000**

equivalent households powered by the electricity produced

**\$100's**

of thousands of dollars in new revenues annually to the host Towns, Counties and School Districts

**>150 jobs**

created during the peak of construction

**~2 full-time**

permanent, highly skilled jobs during operation

# It's not just about generating energy.

## Caring for communities and the climate.

We put local interests at the heart of our projects, aiming to deliver long-term benefits for the communities in which we operate. Our projects help bolster the local economy by providing reliable revenues to landowners and the host communities, creating jobs and bringing opportunities for local businesses.

As a responsible company that champions low carbon growth, we also consider the environment where we work and live. For example, we added several biodiversity and environmental features with our Arnprior Solar Project such as a monarch butterfly conservation project, a bee and honey project, and a natural weed abatement pilot project.

EDF Renewables believes projects will have a better chance to succeed if we have a presence in the community and are available to respond to interests. Developing relationships early during the permitting process and continuing throughout the installation and operation of the projects creates trusting, long-lasting relationships.

## Benefits of Solar

 <b>Renewable</b>	 <b>Reduces Energy Imports</b>
 <b>Endless</b>	 <b>Creates Local Jobs</b>
 <b>Clean Energy</b>	 <b>Generates Local Prosperity</b> (landowner lease, tax revenue)

## Go with the industry leader.

EDF Renewables North America is a market leading independent power producer and service provider with over 35 years of expertise in renewable energy.

We deliver grid-scale power: wind (onshore and offshore), solar photovoltaic, and storage projects; distribution-scale power: solar and storage; asset optimization: technical, operational, and commercial expertise to maximize performance of generating projects, and onsite solutions for commercial and industrial customers: solar, storage, EV charging, energy management systems, and microgrids.

 <b>16 GW</b> solar, wind & storage projects developed	 <b>13 GW</b> under O&M contract	 <b>44 GW</b> in pipeline
