

Early Voting in Cleveland County

Cleveland County General Election in-person absentee or “early voting” numbers by year:

2014- 3,200+ Two Early Voting Sites	2016- 13,700+ Two Early Voting Sites
2018- 10,500+ Two Early Voting Sites	2020- 14,400+ Two Early Voting Sites
2022- 14,200+ Two Early Voting Sites	2024- 33,400+ Four Early Voting Sites

For the 2024 General Election the Cleveland County
Election Board had four Early Voting Sites.

Sooner Mall

Moore Public Library

Moore Norman Tech Center

Noble Public Library

Since the General Election we added a fifth early voting site in east Norman (east of Lake Thunderbird), and we're excited to announce we've secured our sixth site at the newly renovated Cleveland County Fairgrounds.

Absentee Shawnee Tribal
Resource Center

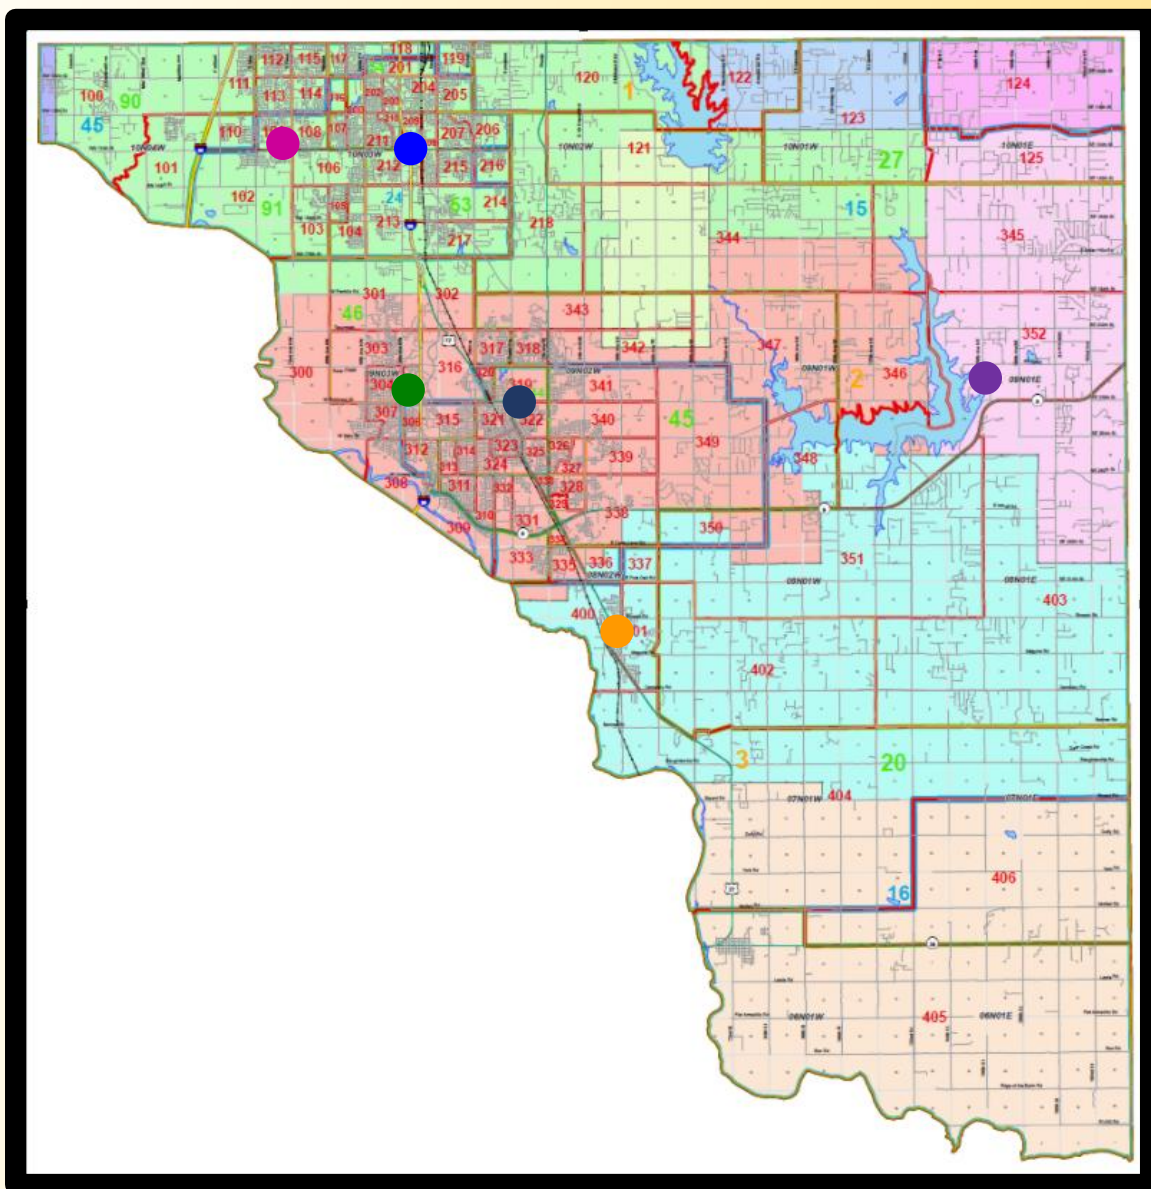

New Cleveland County
Fairgrounds

We've tried to spread our early voting sites out across the county, and secure them in areas of population concentration.

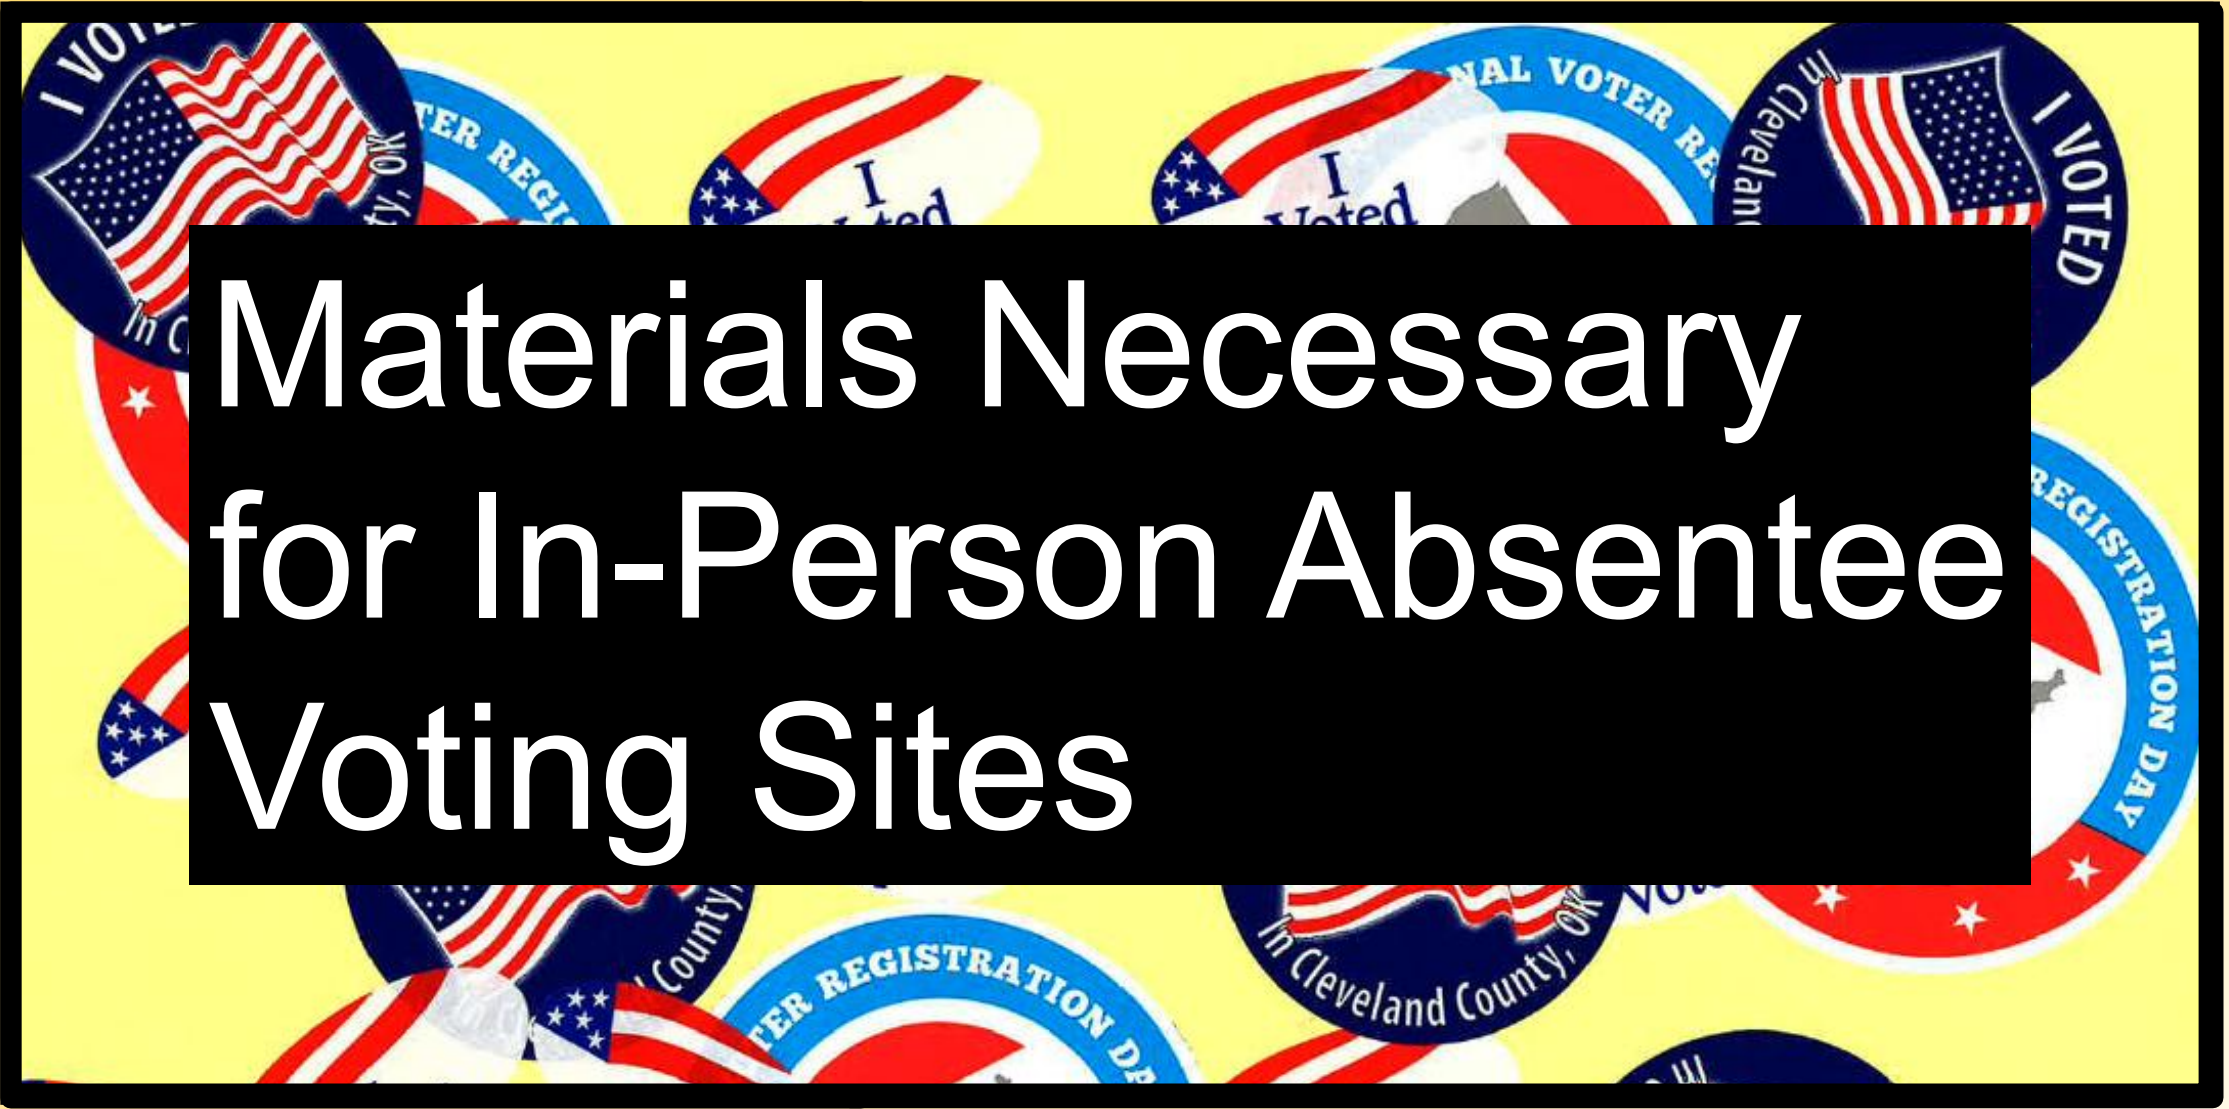

Depending on which entity/entities call an election we open the site/sites closest to that district.

For example on August 12, 2025 The City of Moore and Mid-America Technology Center had elections. So, for early voting we opened our site in Moore, and our sites in Noble and east Norman which were in the Mid-America District. Since Oklahoma City and Norman did not have elections our South OKC and Norman sites remained closed.

For county-wide/state-wide elections like the Board of Education, Primary Election, Runoff Primary, and General Election next year all six of our sites will be open.

- Moore Norman Technology Center- South Oklahoma City
- Moore Public Library- Moore
- Sooner Mall- West Norman
- Cleveland County Fairgrounds- Central Norman
- Absentee Shawnee Tribal Resource Center- East Norman
- Noble Public Library- Noble

Materials Necessary for In-Person Absentee Voting Sites

Ballot Cabinets

Cleveland County has 105 voting precincts. So, each early voting site has four secure rolling cabinets to house every ballot style for all of the county's precincts. (We use 4 ballot cabinets at each in-person absentee site.)

Utility Carts

A large utility cart is used at each site to transport and secure the forms, laptops, printers and other materials used to conduct early voting.

Voting Flags

Laptops, Printers, Security Materials & Other Electronics

Four laptops with the Modern Election Support Application (MESA) are used at each site to process voters and assign voter history credit. Each site also requires printers, an internet hot-spot, VPN keys/tokens, and additional materials to ensure everything thing runs smoothly.

Additional Materials

Other materials include things like:

- Ballots
- Applications for In-Person Absentee Ballots
- eScan Voting Devices
- Ballot Boxes/Ballot Transfer Cases
- Voting Booths
- Pens/Clipboards
- Retractable Stanchions

The State Election Board provides some of these materials.

Expenses

The initial cost for Cleveland County to add an additional early voting sites is about \$15,000.

There are ongoing costs associated with operating our additional early voting sites as well. Each election we have additional absentee voting boards, increased costs from the moving company who delivers election supplies, and additional polling place rental charges. We are very fortunate to have the support we do from our County Officials to be able to make this happen.

Cleveland County Election Board

Mission Statement

The mission of the Cleveland County Election Board is to administer fair, secure and accessible elections in accordance with Oklahoma law. We are committed to delivering accurate results promptly through a transparent process that fosters public confidence in our electoral system from local to federal elections.
