

# URC to SC to HA

Jessica Pfau, CEO

The Lighthouse Behavioral Wellness Centers

# Urgent Recovery Centers

- Urgent Recovery Centers, like Urgent Cares on the physical care side, are a place where persons in crisis can be brought by law enforcement, family members, or present themselves to receive on demand psychiatric care including medications, counseling and support.
- This model has been proven to be efficient, minimize trauma, and get people back on their feet quickly and whenever needed.
- The two Community Mental Health Centers presenting today utilize Urgent Care as a part of their service array which resolves the crisis the majority of the time and allows individuals to continue on into outpatient services, avoiding hospitalization or crisis unit care and additional transportation.

# Continued expansion of the URC Model

- The Lighthouse, as well as ODMHSAS, are committed to utilizing this less expensive, 24 hour 7 day a week model to minimize the number of events a consumer has to experience in order to receive care, and to minimize the amount of transportation required by law enforcement.
- A new URC will be opening in Durant this year!
